

Application for Burn Permit Inspection

A site visit will be required prior to permit issuance.

Complete this form, save it to your computer and attach it to an email to: mfdpermit@maryville-tn.gov to submit.

A Maryville Fire Department representative will contact you. *(Please allow enough time during the holidays).*

**★★ Permits are issued at the sole discretion of the City of Maryville Fire Department. ★★
They can be revoked at any time by the Fire Chief or his designee.**

Items NOT ALLOWED To Be Burned

- Leaves
- Vinyl siding
- Plastics
- Paper products, cardboard
- Asphalt shingles/roofing materials
- Demolition debris
- Asbestos containing materials
- Paints, household and agricultural chemicals
- Aerosol cans and food cans
- Treated lumber/oriented strand board (OSB)
- Painted lumber
- Construction debris
- Buildings/mobile homes
- Coated wire
- Household trash
- Any item transported from another location

Requirements for obtaining an Outdoor Burn Permit:

1. The City of Maryville Fire Department shall be notified on the day of the planned burning in order to visit the site for the issuance of a permit. Permits are valid only for the date issued.
2. Open burning fires greater than 3 feet in diameter shall not be closer than 50 feet from a structure or an adjoining property line. Fires less than 3 feet in diameter shall not be closer than 25 feet. Burning will not be allowed if it is determined that such burning could constitute a hazard to vehicle traffic.
3. The site shall have a reliable source of extinguishing agent. These agents include water, fire extinguishers, or earth moving equipment, or a combination to be determined by the City of Maryville Fire Department.
4. Contractors shall be allowed to build a fire in an enclosed container (such as a 55 gallon drum) for the purpose of warmth for workers when cold weather conditions are present. One drum per construction site will be allowed.
5. The fire shall be constantly attended and shall be completely extinguished before dark.
6. No permits will be issued if weather conditions or local circumstances indicate a hazardous situation could be created.
7. Persons obtaining a permit will be responsible for any damage incurred including that of adjacent property owners.
8. Permits will not be issued for land development except with the use of an air curtain or air curtain incinerator.
9. Complaints regarding smoke from adjacent property owners could result in the permit being voided whereby the fire would have to be extinguished.
10. No flammable liquids are to be used.

I have read and understand the requirements for obtaining a burn permit as well as the list of items that cannot be burned, both of which are outlined above. _____ *(Permit applicant initials)*
