

# RESIDENTIAL SITE PLAN

For a new structure or an existing structure that is being expanded, draw dimensions on the drawing below locating the new structure and/or addition from each property line. Show any utility or drainage easements. The owner may be required to obtain a land survey if the location of the property lines is unknown. If the proposal is for a detached accessory structure, the location, area of the building footprint and the height of the structure from the ground to the peak of the roof must also be included. For swimming pools, include dimensions from the pool to the property lines.
