

Virtual Solar Education

Interested in a solar system for your home? Or simply considering options for greener energy? The Virtual Solar Education is a one-stop, self-service platform that allows users to learn the ins and outs of solar energy and residential solar systems at their own pace and convenience. You can easily navigate the platform by visiting a series of virtual booths that cover important topics such as *Being an Informed Buyer*, *Calculating the cost of a Solar System*, and *Energy Efficiency Tips*. With the Virtual Solar Education platform, you can make an informed decision when choosing the renewable energy solution that fits your needs.

With Virtual Solar Education, you will learn:

- Common myths related to solar cost and generation
- Questions to ask solar installers before signing a contract
- How to calculate the true cost of a solar system
- TVA's Net Metering position
- TVA Green solar programs available through your Local Power Company

Virtual Solar Education “booths” or learning modules:

- About TVA – Overview of Public Power
- How and Why Solar – How solar works
- Home Solar Installation: Be an Informed Buyer – Provides users with resources to select a reputable solar installer
- Home Solar: Project Economics – Sample calculations and links to solar calculators so you can know the true costs of a residential solar system.
- Lower Your Energy Bill with Energy Efficiency – Energy-saving tips to maximize generation for a home solar system or lower your energy bill if you do not have a solar system.
- How You Can Support Renewable Energy – TVA Green programs that support renewable generation in the Valley.
- Next steps – Register your home to take the next step in your solar journey.
